

KOUSHIK T S

PRINCIPAL ENGINEER | REGIONAL LEAD | MES | INDUSTRIAL IoT | DIGITAL MANUFACTURING

Bengaluru, Karnataka, India | 797-515-4267 | koushikts@outlook.com

[LinkedIn](#) | [GitHub](#) | [Company Website](#)

PROFESSIONAL SUMMARY

Principal Engineer and Regional Lead with 10+ years of experience delivering Industrial IoT (IIoT), Manufacturing Execution Systems (MES), Traceability, OEE, SPC, TPM, Tool Life Monitoring, and Smart Manufacturing solutions. Experienced in end-to-end solution delivery covering pre-sales, customer requirement analysis, solution design, application development, UI/screen development, machine integration, installation, commissioning, testing, deployment, training, and post-implementation support.

Strong customer-facing and project execution experience with international exposure in China, including full-plant MES and Traceability implementation, legacy-machine integration, production deployment, technical coordination, and ongoing customer account management. Proven ability to collaborate with customers, sales teams, software development teams, and project stakeholders to convert manufacturing requirements into deployable digital manufacturing solutions.

CORE COMPETENCIES

Manufacturing Execution Systems (MES) | Industrial IoT (IIoT) | Digital Manufacturing | Smart Manufacturing | Traceability | Overall Equipment Effectiveness (OEE) | Statistical Process Control (SPC) | Total Productive Maintenance (TPM) | Tool Life Monitoring | Machine Integration | Legacy Machine Integration | Pre-Sales Engineering | Solution Design | Requirement Analysis | Application Development | UI / Screen Development | Project Execution | Installation & Commissioning | Application Testing | Troubleshooting | Customer Management | Technical Presentations | Product Demonstrations | Customer Training | Post-Deployment Support

PROFESSIONAL EXPERIENCE

AceMicromatic Manufacturing Intelligence Technologies Pvt. Ltd. (Ace Micromatic Group) - Bengaluru, India

June 2016 - Present | Progressive career growth across application engineering, project execution, international implementation, customer management, and regional leadership.

Principal Engineer - Regional Lead | June 2026 - Present

- Lead end-to-end Industrial Digital Transformation initiatives covering MES, Traceability, OEE, SPC, TPM, Tool Life Monitoring, and Industrial IoT solutions.
- Manage the complete solution lifecycle from customer requirement analysis and pre-sales through solution ideation, application/UI development, implementation, testing, commissioning, and project delivery.
- Translate shop-floor manufacturing requirements into deployable software, application, and machine-integration solutions.
- Conduct technical presentations, product demonstrations, solution discussions, and requirement workshops with existing and prospective customers.
- Support business-development activities through technical solution discussions and new-customer opportunity development.
- Continue ownership of the Sundram Fasteners (Zhejiang) Limited, China account for MES, Traceability, application enhancements, technical coordination, and new requirements.
- Coordinate customers, sales teams, software development teams, and project teams throughout solution design and execution.
- Support customer-specific application enhancements, technical issue resolution, implementation planning, and post-deployment requirements.

Senior Application Engineer - China Project Assignment | October 2024 - May 2026

- Took onsite responsibility in China for full-plant MES and Traceability implementation at Sundram Fasteners (Zhejiang) Limited.
- Executed application installation, commissioning, production deployment, and integration of legacy manufacturing machines with digital manufacturing solutions.
- Studied machine operations and manufacturing processes to identify integration requirements and develop suitable solution concepts.
- Coordinated implementation activities between customer stakeholders and internal technical teams.
- Managed customer discussions, requirement clarification, technical issue resolution, application demonstrations, and project coordination throughout the onsite assignment.
- Supported manufacturing processes through MES, Traceability, application configuration, machine connectivity, and production deployment.
- Maintained ongoing technical coordination with the customer for enhancements and new requirements after implementation.

Senior Application Engineer | June 2022 - September 2024

- Managed project execution, customer requirements, solution discussions, and application support for Industrial IoT and manufacturing software projects.
- Supported pre-sales engineering activities including technical discussions, product demonstrations, project quotations, and stakeholder coordination.
- Worked closely with software development teams on customized application requirements and customer-specific enhancements.
- Supported application testing, deployment planning, implementation, and post-deployment activities.
- Coordinated technical requirements between customers and internal teams to support successful project delivery.
- Assisted customers with solution understanding, issue resolution, and application functionality.

Application Engineer | October 2017 - May 2022

- Executed installation and commissioning of Industrial IoT, OEE, and manufacturing software solutions at customer locations.
- Configured manufacturing applications according to project and customer requirements.
- Supported machine connectivity and machine-to-software integration activities.
- Performed application testing, troubleshooting, issue analysis, and technical support during implementation.
- Provided customer training on deployed applications and manufacturing solutions.
- Delivered post-installation support and coordinated technical resolution of customer issues.
- Supported customer-site implementation and production deployment activities.

Junior Application Engineer | June 2016 - September 2017

- Supported Industrial IoT devices, OEE solutions, and Smart Manufacturing implementations.
- Assisted with application engineering, customer-site implementation, installation, and technical support activities.
- Built foundational experience in shop-floor digitalization, manufacturing applications, machine connectivity, and customer-site execution.

SELECTED PROJECT & CLIENT EXPERIENCE

Sundram Fasteners (Zhejiang) Limited - China | MES | Traceability | Industrial Digitalization

- Delivered a flagship international assignment involving full-plant MES and Traceability implementation.
- Supported application deployment, production commissioning, legacy-machine integration, and manufacturing process digitalization.
- Analyzed machine and production-process requirements and supported development of appropriate integration solutions.
- Managed onsite customer coordination, requirement discussions, technical troubleshooting, demonstrations, and project execution.
- Continued customer ownership after the onsite assignment for application enhancements, technical coordination, and new requirements.

GEA | Traceability | Customized Manufacturing Software

- Supported manufacturing Traceability and customized software solutions.
- Worked on customer requirement analysis, application workflows, implementation, and technical coordination.
- Collaborated with customer and internal teams to support customer-specific manufacturing requirements.

Bosch | Customized Manufacturing Projects | Machine Integration

- Supported customized manufacturing software projects involving machine integration.
- Worked on customer-specific solution requirements, application testing, troubleshooting, and technical coordination.
- Supported implementation activities connecting manufacturing equipment with software solutions.

EARLIER EXPERIENCE

Bosch Ltd., Adugodi / Bidadi - Bengaluru, Karnataka

Technical Apprentice - Electronic Mechanic | March 2014 - April 2016

- Completed National Trade Apprenticeship Scheme in-plant training.
- Gained hands-on exposure to machine building, SPC machines, conveyor systems, PLC-based machines, and drive-based machines.
- Supported electrical testing, controller configuration, panel-board setup, and troubleshooting.
- Worked with electrical schematics, wiring diagrams, controllers, and electrical test instruments.
- Developed foundational knowledge of industrial machinery, automation systems, electrical systems, and manufacturing environments.

TECHNICAL SKILLS

Manufacturing & Digital Technologies: Manufacturing Execution Systems (MES), Traceability, Overall Equipment Effectiveness (OEE), Industrial IoT (IIoT), Smart Manufacturing, Digital Manufacturing, Statistical Process Control (SPC), Total Productive Maintenance (TPM), Tool Life Monitoring

Software & Data: SQL, Power BI, Microsoft Office, Application Testing, Data Management

Application & Solution Engineering: Requirement Analysis, Solution Design, Application Development, UI / Screen Development, Application Configuration, Application Deployment, Customized Software Solutions

Machine & Industrial Integration: Machine Integration, Legacy Machine Integration, Machine Connectivity, Installation, Commissioning, Production Deployment, Electrical Testing, Troubleshooting

Project & Customer Delivery: Project Execution, Project Planning, Pre-Sales Engineering, Technical Presentations, Product Demonstrations, Customer Requirement Management, Customer Coordination, Stakeholder Coordination, Customer Training, Technical Support, Post-Deployment Support

EDUCATION

Bachelor of Computer Applications (B.C.A.) - Data Science & Data Analytics | Expected January 2028

Visvesvaraya Technological University

Diploma - Electrical, Electronics and Communications Engineering | June 2017 - June 2022

The Oxford Evening Polytechnic, Bengaluru

National Trade Apprenticeship - Electrical & Electronics | Completed April 2016 | 76.44%

Bosch Ltd.
